Serverless Chrome Device Printing Solution with

PrinterLogic

Serverless Printing Infrastructure

PrinterLogic is a platform that lets enterprises centrally manage and deploy network printers or eliminate print servers altogether while maintaining all the functionality they used to provide.

PrinterLogic also allows end-users to install their own printers with a web-based printer installation portal for the entire enterprise, drastically reducing support calls and saving time.

As Google Cloud Print is no longer supported, schools need to find an alternative print solution.

PrinterLogic's Chrome OS extension enables the next step toward achieving a cloud-first IT strategy by leveraging a scalable, multi-tenant SaaS solution with zero server deployments.

Migrate Easily
Using PrinterLogic's Chrome OS Extension, easily migrate from Google Cloud Print.

Centrally Manage Printing
Manage all printers and deployments from a single pane of glass.

Eliminate Print Servers
Save management costs and helpdesk resources while reducing IT infrastructure.

Secure Your Print Data
Keep print jobs local and secure with Direct IP printing.
