

With the perfect partner, incredible things can happen

Work securely and seamlessly from Anywhere with IGEL, Citrix Workspace and Citrix Cloud

Work from home and secure remote access are more important than ever.

Citrix and IGEL wrote the book on it.

Take your business to new heights with Citrix Cloud and IGEL OS

- Transition to your cloud of choice, at your pace from any infrastructure on existing hardware
- Extend on-premise deployments, easily connect to resources on any cloud or infrastructure with Citrix Cloud services

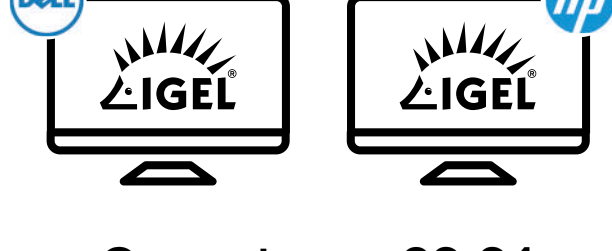

Trusted by Innovators Worldwide

100M
Citrix Virtual App and Desktop Users

17,000
Organizations running on IGEL OS

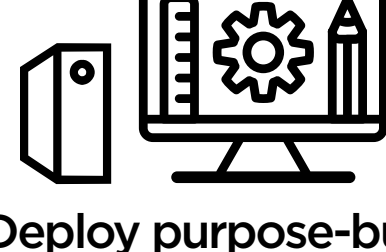

Enable Flexible Workspace Access from Any Device at Any Time

Convert any x86-64 device to IGEL OS

Enable personal PC use with UD Pocket

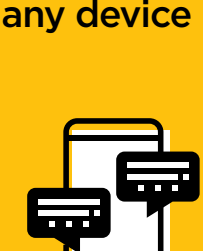

Deploy purpose-built IGEL devices

Connect on the go with the Citrix Workspace app

Increase User Productivity and Satisfaction

The Citrix Workspace portal makes accessing business applications easy on any device

IGEL-managed endpoints are highly responsive and auto-configure based on pre-defined profiles.

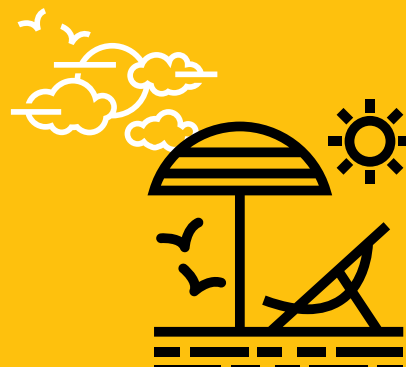

Reduce CapEx

- Extend the life of existing hardware
- Delay or avoid hardware refresh expenses
- Use employee-owned PCs simply and securely

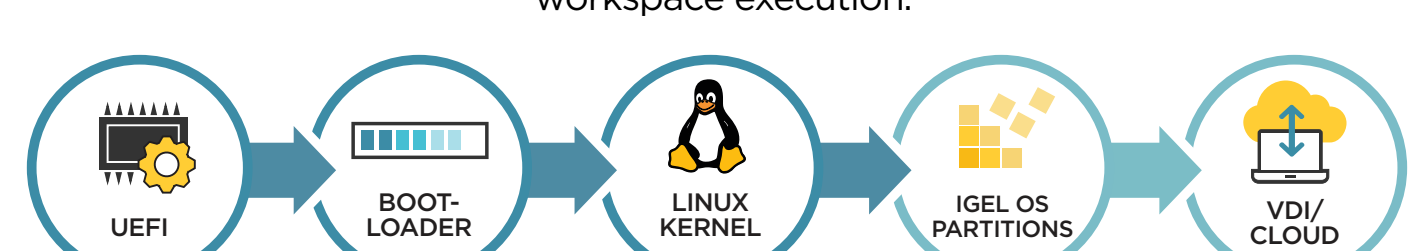

Improve IT Efficiency

- Eliminate the need for remote Windows patching
- Update endpoints quickly and reliably
- Automate endpoint configuration
- Simplify use of data center and cloud resources
- Host and administer Citrix services on-prem or your cloud of choice with the Citrix Cloud platform

Implement Enterprise-Grade Security

Shifting workspace execution and sensitive data from endpoints to the data center or cloud with Citrix Workspace reduces risk. IGEL OS takes this a step further by creating a complete "chain of trust" from device boot to cloud workspace execution.

Citrix Workspace and IGEL OS also give IT teams granular control over the workspace and hardware features that are accessible to users.

An ecosystem of over 100 technology partner solutions are integrated in IGEL OS
